

JOB TITLE: Senior Consultant

LOCATION: Houston, TX

DUTIES: Deliver robust mission-critical software solutions by adhering to industry standards. Ensure solutions are intuitive to use, conform to current applicable standards, and easily interface to third-party solutions. Implement best practices throughout the software development lifecycle, emphasizing sound design, meticulous coding, thorough documentation, and rigorous testing. Develop and maintain custom interfaces from existing third-party applications. Develop technical solutions tailored to meet business requirements. Complete assignments as assigned by the senior management team. Write customer documentation as required and to the client's satisfaction. May work from home and reports to Houston, TX office.

MINIMUM
REQUIREMENTS:

Bachelor's degree or foreign equivalent in Computer Science, Computer Engineering, or closely related field plus three (3) years of experience in the job offered or three (3) years of experience in a related occupation with IT-related experience developing software and systems for small to medium business environments; utilizing Microsoft technologies including .NET Framework Stack, Core Stack, Entity Framework, Web API, MS Azure Stack, Azure DevOps; MS BizTalk Server, Microsoft SSIS, SSRS, TSQL and utilizing Agile methodologies for planning and estimating development efforts.
